

**Har Ghar Jal  
Jal Jeevan Mission**

**Digital initiatives  
under  
Jal Jeevan Mission  
for assured water service delivery**

**National Jal Jeevan Mission,  
Dept. of Drinking Water & Sanitation  
Ministry of Jal Shakti  
Government of India**

# Areas of 'Digital Transformation' under JJM

- Jal Jeevan Mission focuses on development of local public utility for water service delivery;
- Technology has been used as enabler to achieve core objectives of Jal Jeevan Mission;
- Community participation in planning, implementation, monitoring and O&M;

1

## Planning

- Focuses on creation of adequate infrastructure;
- Prudent expenditure of public money;
- Planning to be done keeping in mind that 'No one is left out';

2

## Implementation

- Participation of public in life changing mission through JJM Dashboard and citizen application, Rashtriya Jal Jeevan Kosh;
- Building partnerships through KRCs, sector and strategic partners;

3

## Monitoring

- Transparency in the expenditure of funds;
- Monitoring of implementation
- Monitoring of service delivery;

4

## Operation & Maintenance

- Development of local public utility;
- VWSC/ Paani samiti to take care of water supply systems for next 30-40 years;

# Statement of Digital Vision's Outcomes

1

Design of cost effective schemes

2

Continuous monitoring of progress

3

Improved transparency

4

Development of local water utility

5

Integration of databases

# Digital Initiatives Under JJM

Har Ghar Jal  
Jal Jeevan Mission

## **Jal Jeevan Mission** **Har Ghar Jal**

‘Building Partnerships  
Changing Lives’

01

## JJM IMIS

brings together all data, i.e tap connection provided at HHs, VAPs, DAPs, SAPs, VWSCs details, scheme completion data, scheme planning and expenditure data, financing and funding details, the progress of support activities, progress in priority areas etc.

02

## JJM Dashboard

captures all essential monitoring parameters i.e., no. of FHTCs provided, changes after launch of mission, up to village level details, grievance redressal system, real time sensor based measurement and monitoring, availability of funding;

03

## JJM WQMIS

all functional laboratory in the country are one click away from community so that anyone can identify the nearest water testing lab and can get their private water tested and get results digitally, so that trust can be built for the public water supply department ;

04

## IoT Platform

to monitor Key Performance Indicators, and also ensure quick response, minimum service delivery outage, minimum water loss, optimise efficiency and monitor the quantity and quality on sustainable basis;

05

## Mobile app

enables data collection for Paani Samiti/ VWSC, GPs and officials using mobile or laptop. The data will be regarding financial collection, progress of work, maintenance etc. of water pipes, water assets and other water related information at the village block level;

06

## Analytical tool

to support data analysis, predictive analytics, monitoring and preparation of dashboards is needed. Analytical tool will identify and understand the features capabilities which are a must or are good to have and should generate dashboard;

07

## PFMS

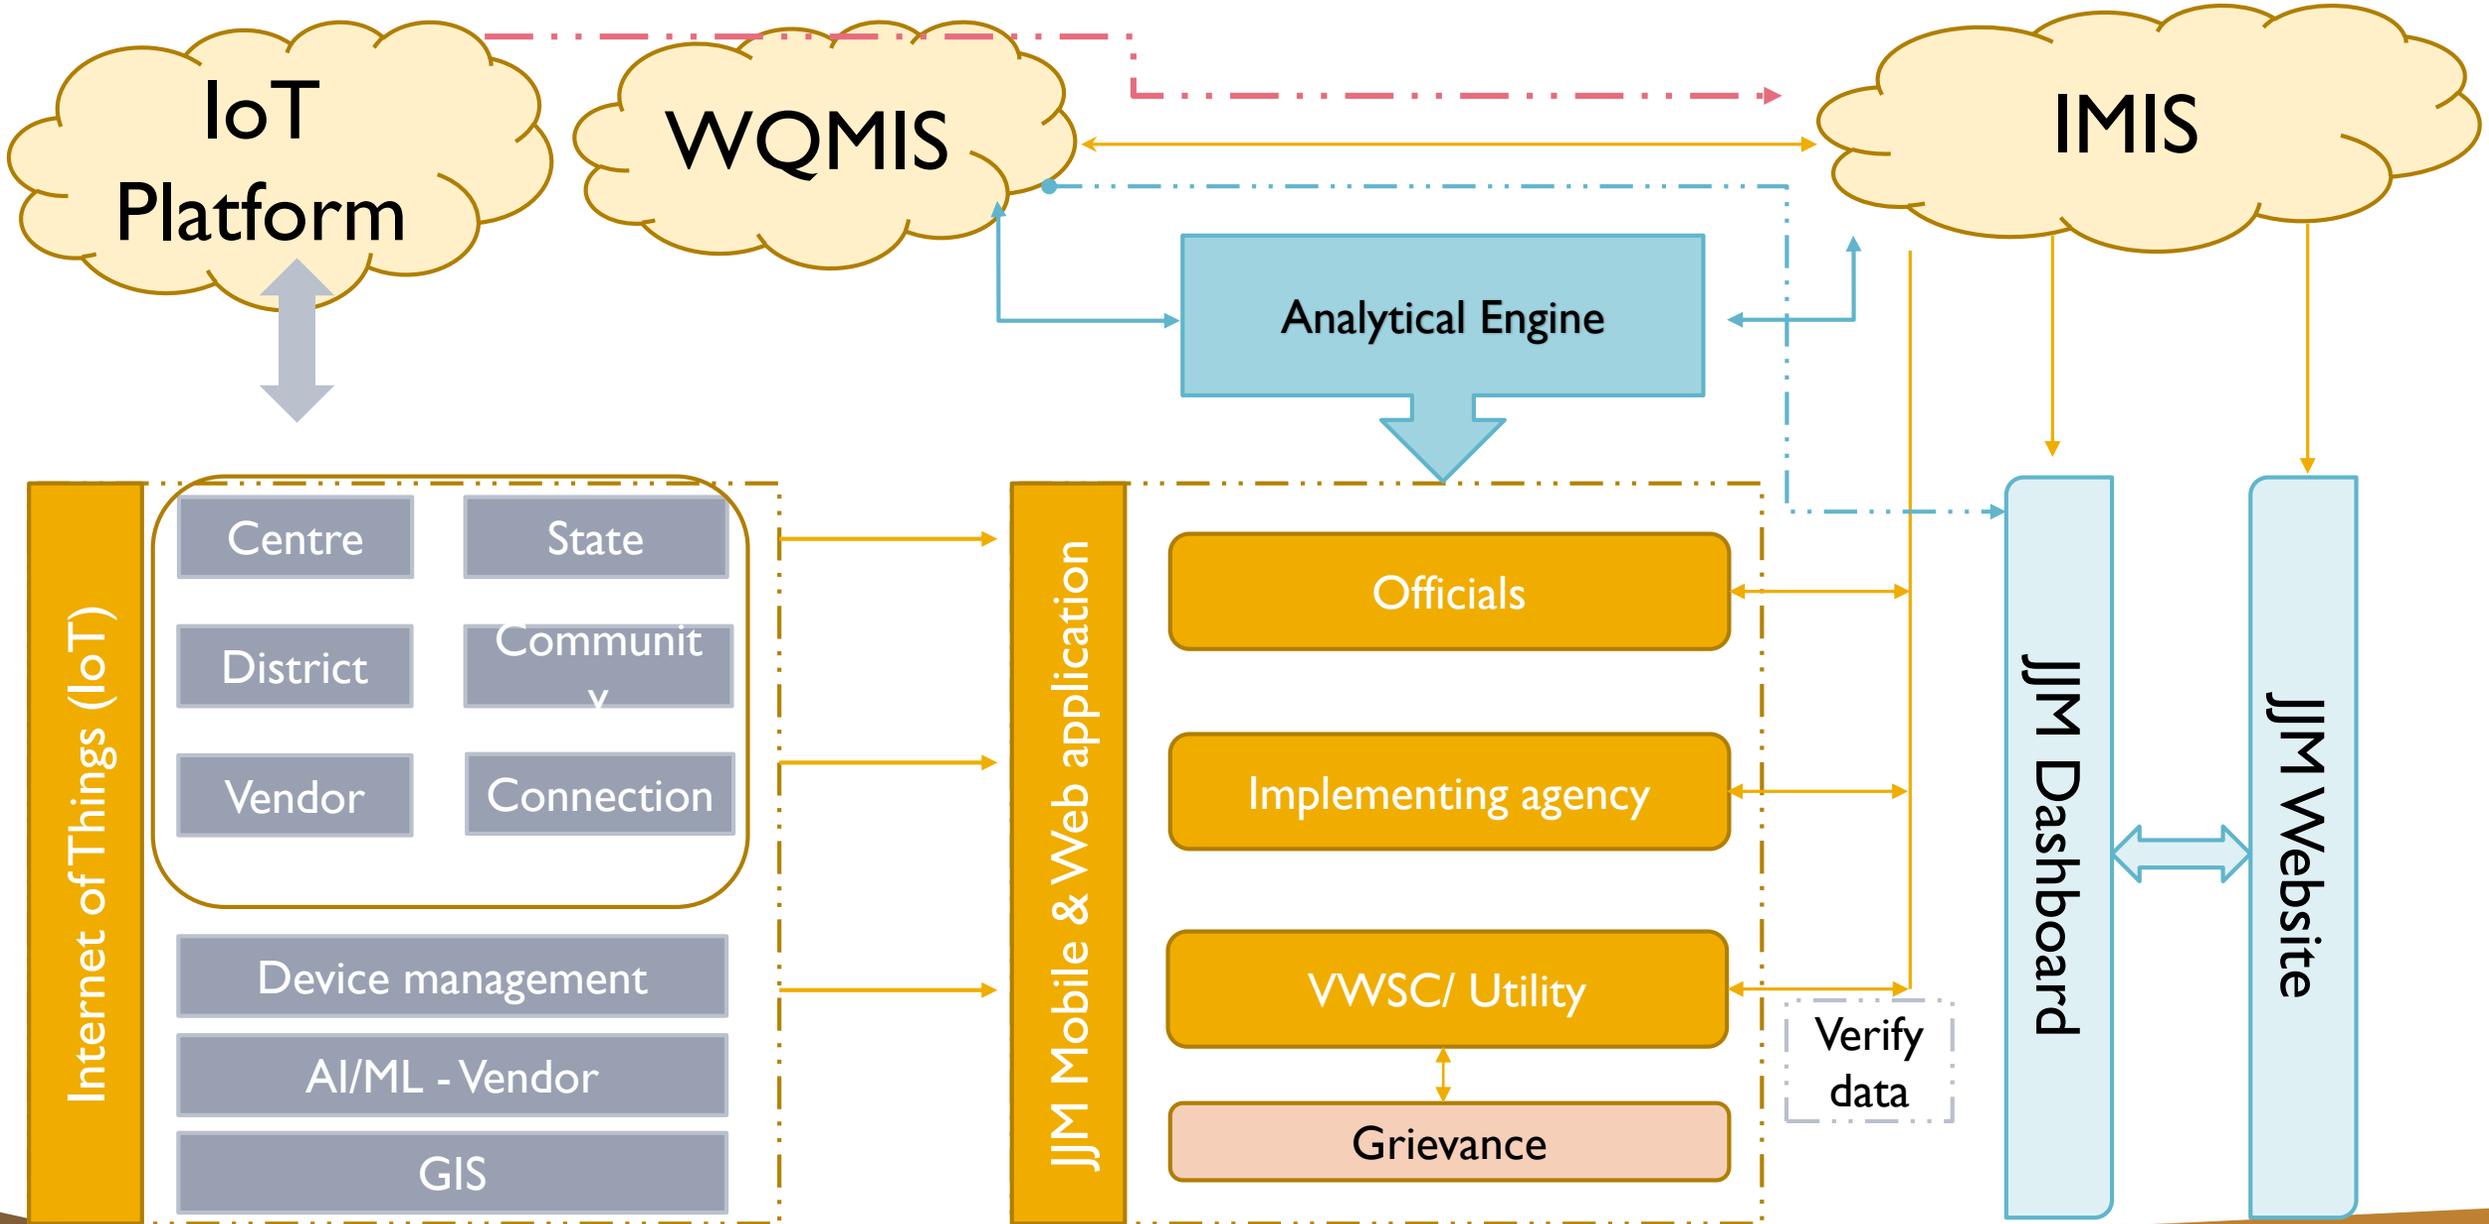

Under JJM the online tracking of disbursement and expenditure being done through the use of the "Public Finance Management System (PFMS), which leads to transparency and prudent expenditure of public money;

08

## JJM Website & RJK Portal

Information about overall policy formulation, planning, financing and coordination for JJM. RJK portal enables individuals/ organisations to donate/ contribute in making provision of clean drinking water in village of their choice

# Relation between Digital Platforms of Jal Jeevan Mission

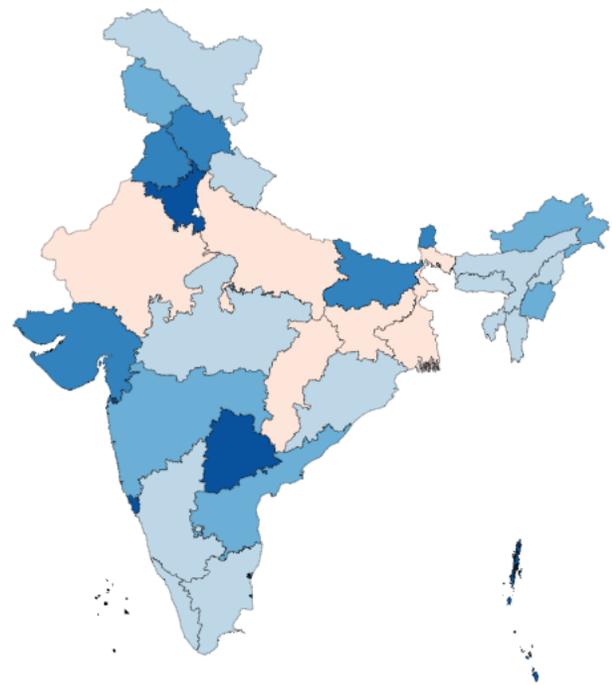

- JJM-IMIS keeps all program related data;
- JJM-IMIS stores the inventories of all the assets that will be needed to provide service i.e. water supply
- It also maintains database of beneficiaries;
- The database available on IMIS will be utilised by the JJM mobile and web application which enables PHED officials and VWSCs/ Paani Samities to keep track of the assets which will help in proper Operation & Maintenance during the outage;
- JJM-Dashboard is powered by IMIS database;

## Tap water supply in households (HHs) | India

As on 09 Dec 2021  
State view | District view

### Status of households with tap water connection (as on date)

State/ UT	Total households	Households with tap water supply	Households with tap water supply (%)
Goa			
Telangana			
A & N Islands			
Puducherry			

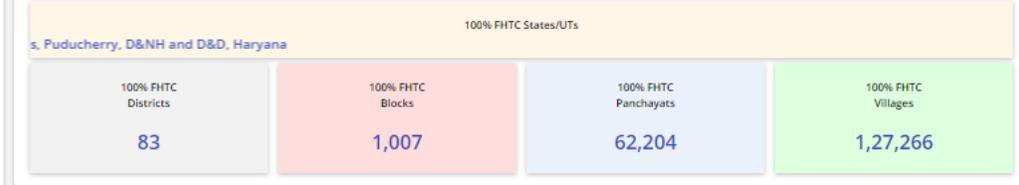

## India | Status of tap water supply in rural homes

Total number of households (HHs)	Households with tap water connections as on 15 Aug 2019	Households with tap water connections as on date
<b>19,22,52,674</b>	<b>3,23,62,838</b> (16.83%)	<b>8,63,93,787</b> (44.94%)

Households provided with tap water connection since launch of the Mission

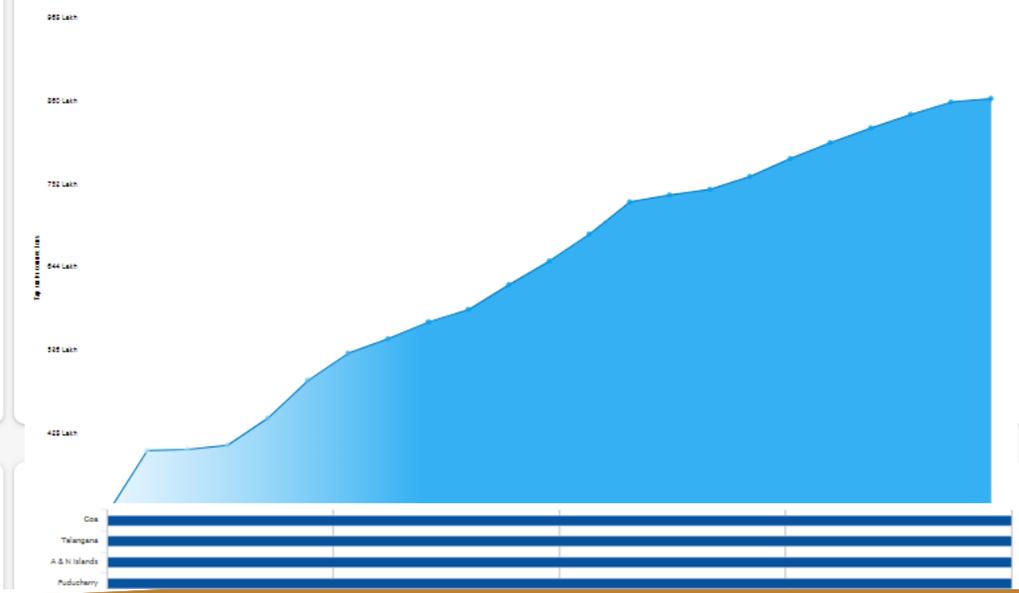

**5,40,30,949** (28.10%)

### Har Ghar Jal [100 % HHs with tap water connections]

### Progress: HHs provided with tap water supply

Yearly | Cumulative

# Highlights of JJM Dashboard

## India | Status of tap water supply in rural homes

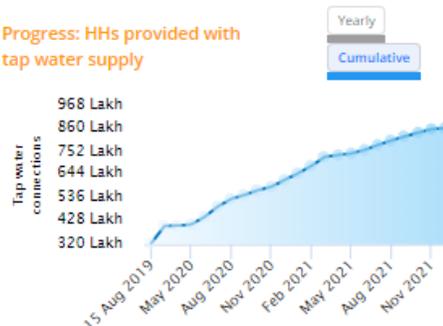

Total number of households (HHs)	Households with tap water connections as on 15 Aug 2019	Households with tap water connections as on date
19,22,52,674	3,23,62,838 (16.83%)	8,63,93,787 (44.94%) +69,635

Households provided with tap water connection since launch of the Mission  
**5,40,30,949** (28.10%)

## Har Ghar Jal [100% HHs with tap water connections]

100% FHTC States/UTs Goa, Telangana, A & N Islands, Puducherry, D&NH at			
100% FHTC Districts 83	100% FHTC Blocks 1,007	100% FHTC Panchayats 62,204	100% FHTC Villages 1,27,266

## Progress: HHs provided with tap water supply

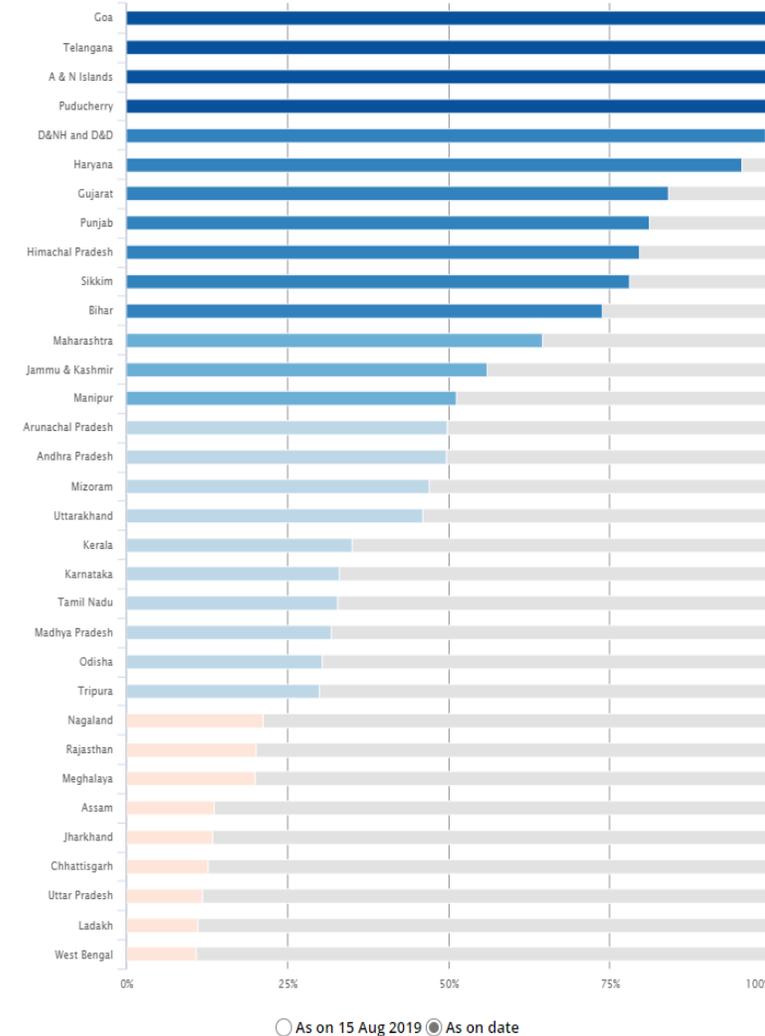

Reflects the progress made under mission;

Number of tap water connections provided on daily basis and since the launch of the mission at national and state level;

Status of states/UTs, Districts, Blocks, Panchayats and Villages which have achieved the 'Har Ghar Jal' status by providing 100% tap water connections;

State and district wise status of households with tap water connections as on 15<sup>th</sup> August 2019 and as on date, so that progress of each state/UT can be monitored;

## Status of households with tap water connection

Development of local water utility

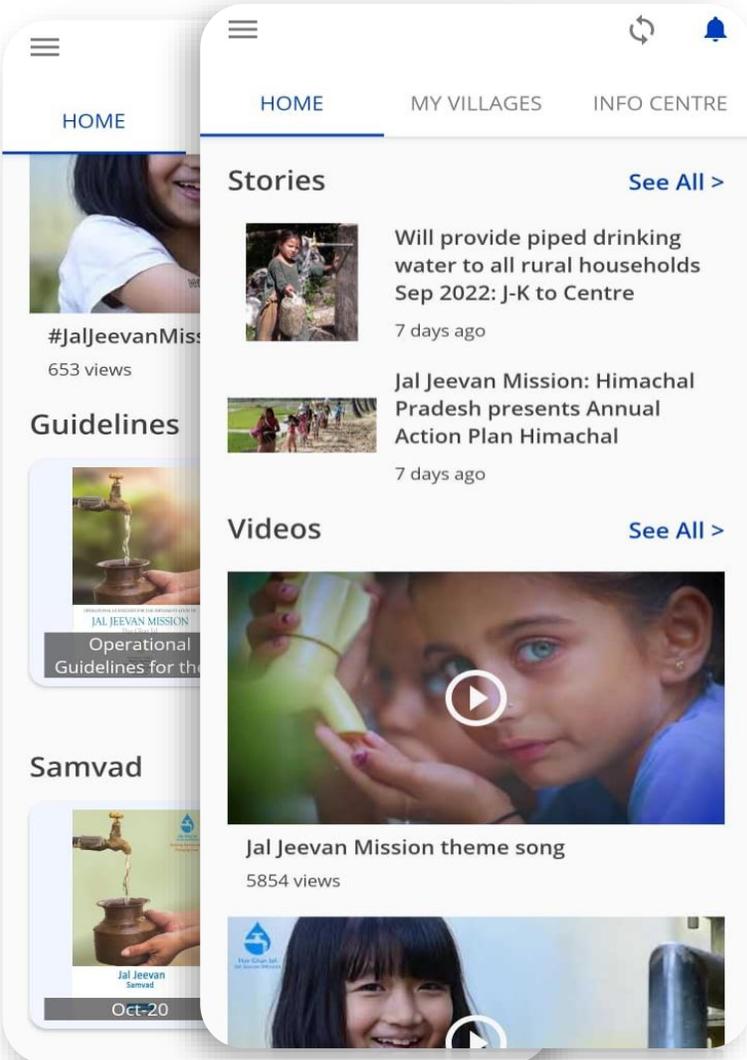

# JJM Mobile and Web Application: Features

Har Ghar Jal  
Jal Jeevan Mission

It shows the number of villages assigned from various blocks. By clicking "See all villages" you will reach the "My villages" tab where you can see the entire list

Shortcut button to tag water sources

Use this button to sync the app with server:

- Download latest village information
  - Upload form data
- Orange Sync Button: Not Synced  
Green Sync Button: Synced

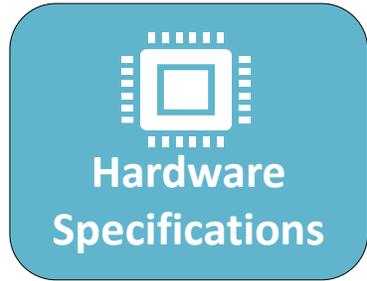

Under "My Villages" tab all the villages assigned to you will appear

Under Info Centre, you can access to the content related to JJM to help you learn, grow, and perform better at your job e.g., videos, FAQs, guidelines etc.

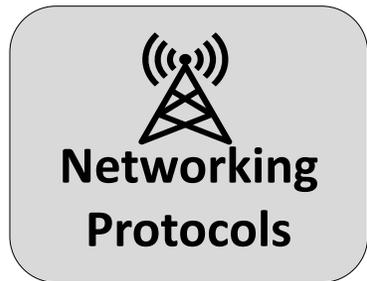

Villages are classified into different stages. You can click on these cards to view villages within that category

**Data to be captured, sensors to be used** (type & location) for different village archetypes in India; & **func. requirements**

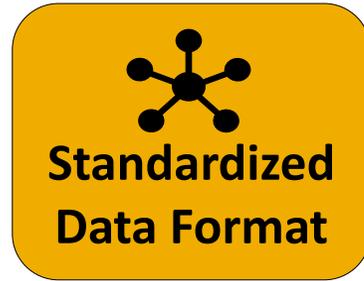

**Device requirements, accuracy, range,** operating conditions, standards (e.g., ISO:4064) & certifications (e.g., FCRI)

**Networking technologies** (e.g., LoRa, 2G/3G/4G/5G, NB-IoT) & **Comm. protocols** (e.g., MQTT, HTTPs, AMQP)

**Roles and responsibilities** of GP / District / State / Center for execution & sustenance of IoT-based smart water mgt. + **Rollout plan**

**Data elements, format** (device to cloud, state to central cloud), frequency of transmission; and interoperability (DLMS)

**Device, network, and application-level security standards** (AES; DTLS / SSL / TLS) for IoT implementation

- **The Public Financial Management System (PFMS)** has been started with the objective of tracking funds released under all Plan schemes of Government of India, and real time reporting of expenditure at all levels of Programme implementation.
- It provides a robust system for ensuring 'Just in Time' releases in respect of **Central Sector (CS)** and **Centrally Sponsored Scheme (CSS)**.
- **Efficient and effective tracking of fund flow** to the lowest level of implementation.
- To provide information across all schemes implementation agencies in the country on fund utilization leading to better monitoring review.
- **Decision support system to enhance public accountability**

# Status of ICT Grand Challenge roll-out in states

## ICT Grand Challenge

Pilot project has been started in 100 villages.  
Deployment has been done in 60+ villages;

## ICT Grand Challenge

04 finalists will implement IoT on pilot basis in  
100 villages of 09 states;

States	Site visited	BOQ & Order placed	Deployment start	Deployment Complete	Testing & Data projection
Andhra Pradesh (15)				In 13 villages	In 13 villages
Gujarat (20)					In 20 villages
Haryana (13)			In 11 villages		
Karnataka (13)					In 13 villages
Ladakh (08)				In 03 village	In 03 village
Maharashtra (05)			In 01 village		
Manipur (01)					
Rajasthan (15)			In 09 villages	In 05 villages	In 05 villages
Uttar Pradesh (10)					In 10 villages

# Water Quality Analysis – Traditional vs Advanced

## TRADITIONAL APPROACH

Static Water Testing  
Laboratory

## CURRENT APPROACH

Portable Water  
Quality Analyzer

- Innovation Challenge to develop a portable device:
  - ✓ Ideation
  - ✓ POC development
  - ✓ Prototyping
  - ✓ Product development
  - ✓ Validation/testing
  - ✓ Commercialization

Preliminary evaluation:  
*28 applicants shortlisted*

2<sup>nd</sup> level evaluation:  
*20 applicants shortlisted*

EEC meeting: *10 finalists shortlisted*

# FEATURE COMPLIANCE

S. No.	Features Incorporated
1.	Designed as a <b>portable</b> device
2.	Value of water quality parameters are in <b>digital format</b> output
3.	<b>Easy to carry</b> and handle
4.	Easy to <b>calibrate</b>
5.	Equipped with an in-built power supply (if necessary)
6.	Detects the Microbial Contamination level (If yes, Please give the separate sheet for details)
7.	<b>Low operation and maintenance</b>
8.	Accompanied by a detailed user manual for operating the portable device
9.	<b>Has a provision for data transfer</b>

# Portable devices: details of parameters can be tested

Har Ghar Jal  
Jal Jeevan Mission

## Pics of the portable device

## Name of the Start-ups / Innovators

**EarthFace Pvt. Ltd**      **Annalyticals**

## Parameters can be tested

pH, Turbidity, TDS, Hardness, Free residual chlorine, Fluoride, Nitrate, Total alkalinity, Ammonium chloride, ecoli

**Elico Pvt. Ltd**

Testing ground water-based source near urban areas for parameters including Phosphate, Nitrate, Ammonia, Chromium and Turbidity

**Digital Rural India Mission**

pH, Turbidity, TDS, Hardness, Free Residual Chlorine, Fluoride, iron, Nitrate, Potassium, Alkalinity, Calcium, Magnesium, Arsenic, Selenium, Zinc, Mercury, Lead, Chromium,
